Hoang Viet Tran

FULL STACK DEVELOPER

Profile

Highly skilled Full Stack Developer with expertise in building modern and responsive web applications. Proficient in user interface design, testing, and debugging. Strong experience in designing, installing, testing, and maintaining web systems. Committed to delivering exceptional results and optimizing user experiences through innovative solutions.

Employment History

Software Engineer , 100Devs, Los Angeles, C.A

AUGUST 2022 — PRESENT

- Led a cross-functional team of developers in **building and delivering** modern, scalable, and responsive web applications, resulting in **a 15% increase** in user engagement.
- **Architect-ed and developed** semantically structured full-stack web applications, **reducing loading times by 20%** and improving overall user experience.
- **Implemented agile methodologies** like SCRUM, **boosting team productivity by 25%** and ensuring on-time project delivery.

Recent Projects:

1. The Wild Oasis (Full-stack Web App)

- **Optimized performance** through efficient cabin data management, **resulting in a 17% decrease** in system downtime.
- **Designed and implemented** a comprehensive table view and dashboard, providing hotel staff with real-time guest check-ins and outs, leading to **a 30% improvement** in operational efficiency.

2. Filmpire (Front-end Web App)

- **Engineered a high-performing front-end** personalized profile system, **increasing user retention by 18%** and attracting new users.
- Utilized AI and the IMDB API to deliver rich movie information and recommendations, **driving a 25% surge** in user satisfaction and engagement.
- Implemented robust authentication measures, ensuring **100% data security** and compliance with industry standards.

3. ProShop (Full-stack E-commerce App)

- **Led the end-to-end development** of ProShop, a robust and user-friendly e-commerce platform, implementing both front-end and back-end functionalities.
- **Enhanced user satisfaction** by **reducing search time by 25%** through the implementation of advanced filtering and sorting features, ensuring a seamless and enjoyable shopping experience.

Other Projects:

- **Developed and deployed** various successful web applications, including The Tech Times blog website, Tidal music player app, and more.

Bachelor of Computer Science, La Trobe University, Melbourne

AUGUST 2026

- Pursuing an intensive curriculum encompassing comprehensive computer science principles and advanced programming languages.
- Cultivating a strong foundation in data structures, algorithms, and cutting-edge software engineering methodologies.
- Demonstrating a disciplined and analytical approach to problem-solving, consistently achieving optimal outcomes in academic and practical projects.

Certfications

1. Meta Full Stack Developer Certificate:

- Completed an intensive Full Stack Developer program with a focus on both Front-end and Back-end technologies.
- Developed and deployed **3 fully functional web applications**, honing skills in creating user-friendly interfaces and scalable web systems.

2. Codecademy Full Stack Engineer Certificate:

- Successfully finished a comprehensive Full Stack Engineering course covering HTML, CSS, JavaScript, Git & Github, React, Redux, Node.js, Express.js, SQL, PostgreQL and Web Security,
- Completed **200+ challenging coding exercises** with an average score of **85%**, showcasing strong problem-solving abilities.
